

Lorenz Jedd M. Alvarez

lorenzjeddalvarez2@gmail.com | 09260920542

Skills

Languages & Frameworks: Java, C#, Python, PHP, JavaScript, TypeScript, ReactJS, Angular, ASP.NET Core

Databases: SQL Server, MySQL, NHibernate

DevOps & Deployment: Azure DevOps, Git, IIS Server Management

Cloud: Microsoft Azure

Testing & Quality: Unit Testing, Integration Testing, Debugging, Performance Optimization

Methodologies: Agile/Scrum, Team Mentorship, Cross-functional Collaboration

Experience

Software Developer II, Systems and Software Consulting Group Inc. – Makati City, PH April 2026 – Present

- Facilitated Scrum ceremonies including daily stand-ups and sprint planning, ensuring alignment of development priorities.
- Mentored and onboarded new developers through enablement trainings, accelerating team productivity and skill growth.
- Directed manual deployments via server management and IIS configuration, ensuring smooth rollouts when automated pipelines were unavailable.
- Led feature design discussions with stakeholders, translating business requirements into scalable technical solutions.
- Reviewed and optimized codebases for performance and maintainability, reducing technical debt and improving long-term system stability.

Software Developer I, Systems and Software Consulting Group Inc. – Makati City, PH November 2024 – March 2026

- Engineered in-house application to ensure stability, scalability, and extensibility, supporting enterprise-level operations.
- Delivered client-specific fixes and new functionalities aligned with regulatory and operational requirements, improving compliance efficiency.
- Resolved feature and bug tickets for a banking compliance system, reducing downtime and enhancing reliability.
- Redesigned company website to improve usability and performance, resulting in faster load times and better user engagement.
- Collaborated with cross-functional teams to streamline project delivery and maintain efficient workflows.
- Leveraged Azure DevOps, C# MVC, NHibernate, SSMS, Angular, TypeScript, and ASP.NET API for seamless frontend-backend integration and deployment.

IT Development Engineer Intern, International School Manila – Taguig City, PH March 2024 – July 2024

- Developed an accessible, responsive website for listing professionals, ensuring inclusivity and mobile-friendly performance.
- Implemented ReactJS UI with Zustand state management and Bootstrap styling, streamlining front-end workflows and enhancing maintainability.
- Optimized data accessibility and improved user experience, reducing navigation friction and increasing engagement across devices.

Software Developer, JIMAC Incorporated – Quezon City, PH March 2023 – March 2024

- Developed tailored software solutions to improve data handling and system integration, streamlining project-based operations.
- Built a File Checker to transmit data securely to APIs, ensuring accuracy and reliability in data exchange.
- Created a Point of Sales System with API integration, enhancing transaction efficiency and operational scalability.

- Engineered a Table Extractor to generate files from database tables, reducing manual workload and improving reporting speed.
- Enhanced data processing efficiency and system integration, resulting in smoother workflows and reduced operational bottlenecks.

Database Documenter, JIMAC Incorporated – Quezon City, PH

Aug 2014 – Sept 2020

- Documented and organized database structures to improve clarity, consistency, and accessibility across projects.
- Created detailed descriptions of databases, tables, and columns while mapping and visualizing relationships between tables, enhancing system understanding.
- Improved documentation accuracy and data clarity, enabling easier database management, streamlined analysis, and faster onboarding for technical teams.

Projects

SmartMango (Thesis)

- Developed a web-based precision farming application for Carabao mango post-harvest optimization, improving efficiency in agricultural **workflows**.
- Integrated YOLOv8 Nano-object Detection Model and Multiple Linear Regression using ReactJS, Flask, TailwindCSS, and MySQL, enabling data-driven farming techniques.
- Enhanced decision-making in post-harvest processes by leveraging AI-powered detection and predictive analytics, resulting in better farming outcomes.

iPitaka (11th IT Skills Olympics)

- Developed a web and Android application to help users manage finances by analyzing spending habits and suggesting budget allocations.
- Implemented PHP, HTML, Bootstrap, jQuery, XML, Java, MySQL, and Oracle Cloud to build a data-driven platform for expense tracking and financial advice using time-series data.
- Enabled smarter financial decision-making by providing actionable insights, promoting better budget management and improved financial stability for users.

Education

University of Makati – BS in Computer Science

2024

University of Makati – TVL - Computer Programming

2020
